Side Curtain Instructions

Contents

- 1 Passenger Side Curtain
- 1 Drivers Side Curtain
- 1 Curtain Storage Bag
- 2 Snap Screws

Installation Procedures

- If your top contains a zipper on the inside of the top, zip curtain in and follow the instructions for installing the snap and functioning your side curtains.
- This side curtain is shown in black on a tan top for visualization purposes only.
- Start with the drivers side curtain. Sitting in the car attach the front strap around the forward portion of the a-rail as show.
- Next attach the second strap to the middle of the a-rail as shown.

Installation Procedures

- The rear part of the curtain contains a enclosed metal rod this must be tucked behind the outer portion of the top bow. As shown by the arrow.
- This also has a strap that needs to be looped around the bow and back to itself.

Installation Procedures

- The lower portion of the curtain gets tucked to the outside of the canvas retention wire. The Velcro strap loops through the inside and back to itself.

Installation Procedures

- The elastic loop on the front outside of the side curtain is intended to hook around the lower wing nut on your windshield.
- The tab on the curtain gets tucked behind the pivot point on the windshield.

Installation Procedures

- The idea is to have the side curtain line up with the rest of the top. As shown by the line in the first picture.
- Next attaching the snap screw to the outer underside of the header. Be sure to pull the curtain tight from rear to front.
- Make a mark on the underside of the header and install the snap. Then snap the canvas to the header.

Installation Procedures

- The rear flap on the outside is intended to stay outside the top. This helps keep the wind & water out when cruising.

Installation Procedures

- The way these curtains work they allow you to open the doors without removing the whole curtain.
- Remove the lower rear Velcro strap unzip the curtain from rear to front and open the door.
- Repeat the above steps for the passenger side.
- The curtains come with a protective film on the inside and out it should be removed after install.

Side Curtain Care

- Special attention should be paid to cleaning of the plastic in the windows. They should be kept free of dirt and abrasive contamination. Meguiras makes a great plastic cleaner and polish if needed.
- If put in storage bag when wet be sure they do not mold up.
