CONVERTIBLE TOP SYSTEM MEASURING GUIDE

Please measure accurately and print clearly.

Customer Name: _____

Street Address: _____

City: _____ **State:** _____ **Zip:** _____

Phone: _____ **Cell:** _____ **Fax:** _____

Email: _____

The following information is critical to assuring our system will be applicable to your specific body. There is a great deal of variation in the Ford Roadster bodies manufactured and assembled over the years. This information will help us tailor a kit for your application.

Body Manufacturer (i.e. Downs, Wescott, Origanl, Brookville etc.): _____

Windshield Manufacturer: _____

Refer to the attached diagram to provide necessary measurements.

A =		Centerline dimension from cowl to inside edge of rear opening.
B =		Centerline dimension from imaginary line drawn between the "B" pillars, to the inside edge of the rear opening.
C =		Dimension from the same imaginary line measured 10" out from the inside of the door or "B" pillar, to the inside edge of the rear opening.
D =		Dimension from the top of your windshield pillar to the leading edge of the "B" pillar.
E =		Length of the door at the door cut lines.
F =		Distance from the door cut line to the center o your top pivot. Mark "n/a" if you do not have the stock pivot.
G =		Distance of the pivot hole center, vertically up from the body edge.
H =		Width of the body, inside.

Upon completion, retain a copy and mail or fax the Measuring Guide to Chad Draper at Rod Tops.
